Subject: 2012 - 2013 SDWA Data Request (Region 8 and Wyoming)
Attachments: StateDatarequest form_2013.pdf; TribalDatarequest_2013.pdf

Dear Ms. Ferguson:

I was having trouble attaching the .pdfs to the online FOIA request, so you'll find them here.

In response to a special registration review by USEPA, Syngenta Crop Protection continues a project to assess human exposure to the triazine herbicides through drinking water. The Safe Drinking Water Act (SDWA) specifies monitoring requirements for Community Water Supplies (CWS) for atrazine and simazine. The primary compounds of interest in this study are atrazine, simazine, metolachlor, and s-metolachlor.

Waterborne Environmental, Inc. has been contracted by Syngenta to compile monitoring results for atrazine, simazine, metolachlor, and s-metolachlor in drinking water on an annual basis. To accomplish this task, we are requesting your assistance in obtaining CWS information and finished water monitoring data for all of **2012 and 2013** (including detections and non-detections). We are asking for 2012 data again in order to capture any additional data that might have been missed in our requests last year. The attached request form details the minimum requirements from your state database. Please include sample data for **systems that are active or inactive** at this time. If there are any CWSs that are not routinely included in your database, please provide us with their contact information so that we can contact them directly.

This e-mail is a formal Request for Information. If you are able to send attachments electronically, please send them to my e-mail address at johnsonl@waterborne-env.com. If this is not convenient please mail the information by Federal Express to my attention, and include an invoice if there are charges for completing the task.

If you have any questions, please contact me at 703-777-0005.

Thank you for your time and assistance.

FOIA Request: EPA-R8-2014-004757

Please use this system, FOIAOnline, instead of r8foia@epa.gov.

I'm having technical problems with r8foia@epa.gov, and in addition, this system became the official FOIA processing system for EPA.
